## **MAJOR RENOVATIONS**

- Students at Wendell Middle School got an early start in a temporary modular campus on the site and have watched as their new middle school was built. Now they get to move into it. Students and staff are excited to be in one building and have everyone under the same roof.
- The new school is part of the 2006 school construction program. The \$31.2 million project included construction of a new 981 student capacity middle school based on the Salem prototype. The prototype had been revised to a 3 story building to fit on the site. The school is located on NC 97 HWY in Eastern Wake County in Wendell.
- The completed project provides a new school facility of 149,379 gross square feet with the latest in technology. Each classroom is equipped with a digital projector and presentation system and at least five computers for student use.
