

## Summary Information For Community Engagement Meetings

Prepared By The Growth and Planning Department

October 29, 2007

Staff in the WCPSS Growth and Planning Department are currently engaged in developing a growth management plan for the 2008-09 school year and preliminary plans for the 2009-10, 2010-11 and 2011-12 school years. Plans are based upon enrollment projections jointly developed with the Wake County Planning Department and the capital improvement program (CIP) that was adopted by the Board of Education in May 2006, approved by the Board of County Commissioners in July 2006 and funded by voters in November 2006.

The primary objective of growth management planning is to provide appropriate environments for teaching and learning for all students by accommodating growth, minimizing the impact of overcrowding and assigning a healthy student population to every school.

Major challenges being addressed for the 2008-09 school year include:

1. Assigning students to three new schools
  - Sycamore Creek Elementary located in northwest Raleigh
  - Laurel Park Elementary located between Cary and Apex
  - Mills Park Elementary located in western Cary
2. Reducing the number of schools operating at more than 100% of capacity
3. Reducing differences between schools in the percentage of students from low-income families assigned to each school
4. Reducing differences between schools in the percentage of limited-English proficient students assigned to each school

The next page in this document shows the planned schedule for opening of new schools based upon the current Capital Improvement Program (CIP).

Subsequent pages present data on all WCPSS schools in tabular format. The data shows the membership (number of students) in each school as of the 20<sup>th</sup> day of the current school year, the number of mobile or modular classrooms at the school as of November 2007, the level of crowding in the school (a ratio of membership to capacity including mobile or modular classrooms) and some demographic descriptors of the student population in the school as of October 25, 2007. Percent Low SES (socio-economic status) is an estimate of the percentage of students from low-income families based upon participation in the federal lunch program. Percent LEP is the percentage of students identified as having limited English proficiency. Note that some LEP students are enrolled in special English as a Second Language (ESL) classes and some are not, based upon their level of proficiency. The final columns in the table describe the sources of the student population of each school. The percentages compare the students attending the school as a base assignment to those attending the school through transfers, magnet or year-round applications, or requests for a traditional calendar.

## Summary of New School Projections
