

1999-2000 End-of-Grade Multiple Choice Test Results

August 8, 2000

Authors: Chuck Dulaney and Glenda Burch

Background

Wake County Public School System (WCPSS) students took the North Carolina End-of-Grade (EOG) multiple choice tests during the months of May and June. Traditional calendar schools tested the week of May 22-26 and year-round schools tested the week of June 19-23.

The EOG tests have several components including: computer skills, open-ended tests, multiple choice tests, and the writing assessment. All EOG tests are designed to measure student achievement of the knowledge and skills of the North Carolina Standard Course of Study for students in grades three through eight. The multiple choice tests are required in reading and math and are optional in social studies and science. During the May/June 2000 administration, WCPSS students took the reading and math multiple choice tests.

The EOG tests are a vital part of the North Carolina Annual Testing Program. They are the basis for the accountability program referred to as “ABCs”—Accountability, Basics, and Control. The goal of the ABCs is to hold individual schools accountable for student achievement in the basic subjects of reading and math. Under this program, test scores will be the basis for rewards or corrective action for individual schools.

Districtwide Results

WCPSS EOG multiple-choice results for 1999-2000 showed increases at most grade levels in both proficiency and average scale score.

- Both mean scale scores and the percentage of students scoring in Levels III and IV increased from 1999 to 2000 in both reading and math for grades 3, 4, 5, and 8.
- At least 80% of students scored at or above grade level in reading in grades 3, 4, 5, 7, and 8 and at least 80% scored at or above grade level in math at all grade levels (3-8).
- Grade 6 showed increases in math and decreases in reading.
- Grade 7 showed a decline in percent proficient in reading and math, but a rise in math scores. For the first time ever, 80% of grade 3 students reached proficiency in math.

Achievement Over Time

The percentage of students meeting or exceeding grade level standards in reading in grades 3, 4, 5, and 8 and in math in grades 3, 4, 5, 6, and 8 are the highest WCPSS students have ever achieved.

Average scale scores also reached new highs in most grade levels (see figures 5 and 6 on page 4). Math test scores reached new highs in all grades, 3-8. Reading test scores are the highest ever achieved in grades 3, 4, 5, and 8.

Achievement Level Scores

The achievement level score attempts to categorize student achievement according to four broad levels, defined as follows:

Achievement Levels

Level I: Students performing at this level do not have sufficient mastery of knowledge and skills in this subject area to be successful at the next grade level.

Level II: Students performing at this level demonstrate inconsistent mastery of knowledge and skills in this subject area, and are minimally prepared to be successful at the next grade level.

Level III: Students performing at this level consistently demonstrate mastery of grade level subject matter and skills and are well prepared for the next grade level.

Level IV: Students performing at this level consistently perform in a superior manner clearly beyond that required to be proficient at grade level work.

One important way of examining test scores is to follow the progress of a cohort of students over time. The shaded and unshaded boxes in the tables below show the scores of cohorts of students. For example, students who were in 3rd grade in 1995 completed 8th grade in 2000. Over time the percentage of students in that cohort who are in levels III and IV and are therefore considered to be “at or above grade level” in reading has increased from 74.4% to 88.7%. In mathematics the cohort increased from 73.5% to 85.7% at or above grade level.

8	83.2	80.6	79.0	83.2	83.8	85.7

Changes Within Grade Levels Over Time

By comparing scores for a grade level to scores achieved in previous years, we see some indication of instructional changes over time, although it must be noted that different groups of students are in each grade level each year. The following graphs show changes within each grade level over the past six years.

Figure 3
Percent of Students in Levels III and IV in Reading

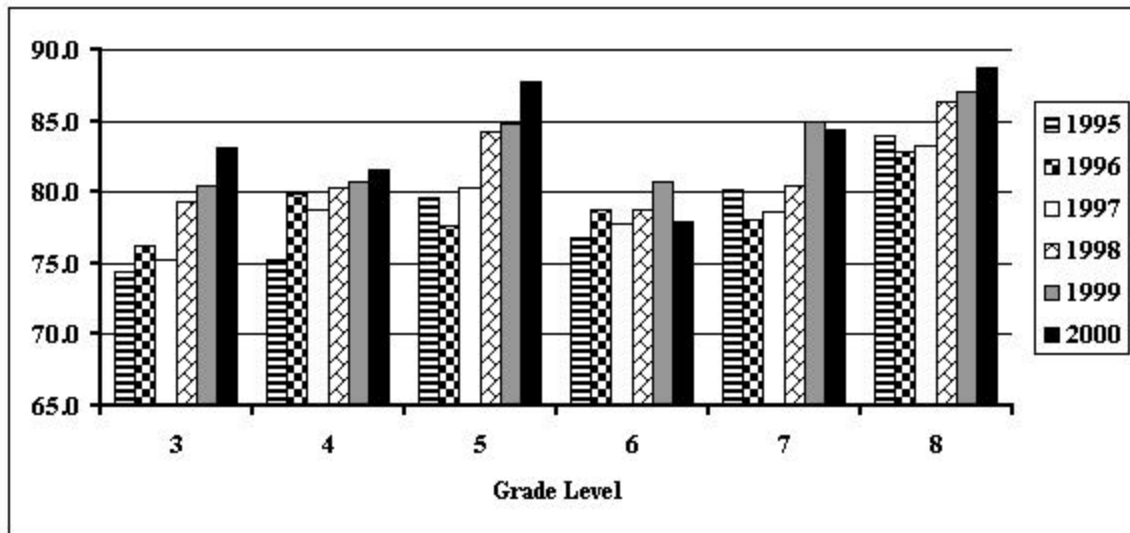

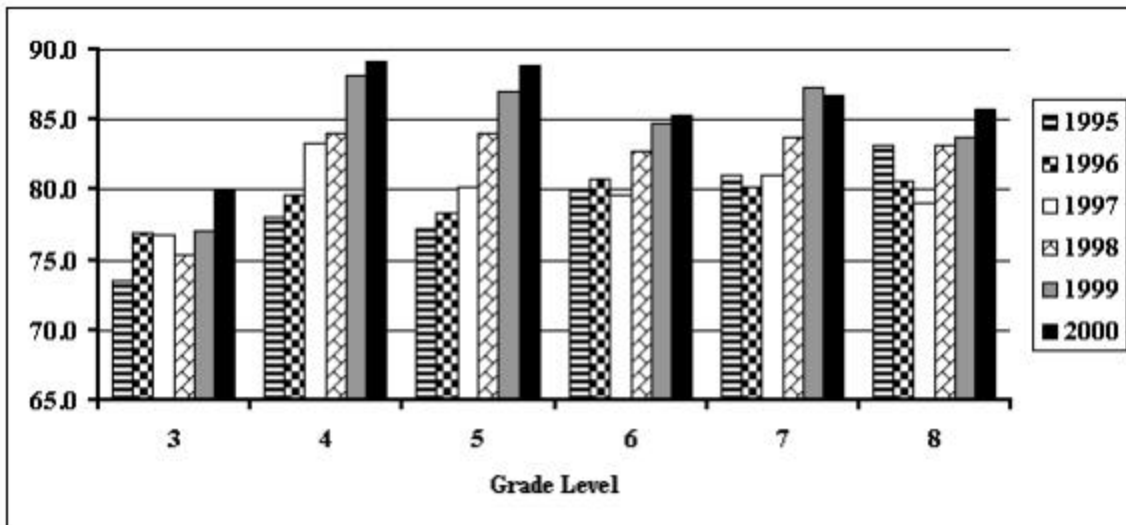

Figure 4
Percent of Students in Levels III and IV in Mathematics

Scale Scores

The EOG scale score was developed by staff at the Thurstone Psychometric Laboratory at UNC-Chapel Hill. The scale covers the entire span from grade 3 through grade 8, and is designed to show growth over time. The scale was designed to begin near 100 and end near 200 with a mean of approximately 150 (anchored at the fifth grade). Mean (average) scale scores for cohorts are expected to increase as students move through grade levels and are an important way to track group changes from year to year.

As shown in Figures 5 & 6, average scores in 2000 were the highest they have ever been in math at all grade levels and in reading in grades 3, 4, 5, and 8.

8	176.1	175.5	175.4	177.4	177.5	178.4

Disaggregated Results

WCPSS disaggregates results for a number of different groups of students. The most common groupings are race and gender, and the following tables show three years of results for the major demographic student groups. Disaggregated test results by school are included in the annual volume of *School Profiles*.

As shown in the preceding tables and illustrated below, significant gaps persist over time when achievement is disaggregated by race and gender, although the gap sometimes narrows as cohorts progress through the system.

progress through the system.

Attached tables show the percentage of students scoring in each achievement level in reading and math for each school, followed by pages showing reading and math scale scores for each school. State results will not be available until later this year.
