WCPSS ADVANCED PLACEMENT (AP) TEST RESULTS, 2007-08

Brad McMillen

College-level coursework is offered to high school students through the Advanced Placement (AP) program. Many colleges and universities provide credit to students who earn a high score on the AP exams, which are offered by the College Board. All comprehensive high schools in the Wake County Public School System (WCPSS) offer AP courses and exams, although the availability of specific courses varies from school to school. Many students take more than one AP course, and not all AP students take the corresponding exams. The cost to take each AP exam is currently \$86.

AP Exam grades determine whether a student is qualified to receive college credit or advanced placement into a higher level course in college. The scores are reported on a 5-point scale as follows:

- 5 = Extremely well qualified
- 4 = Well qualified
- 3 = Qualified
- 2 = Possibly qualified
- 1 = No recommendation

Analysis of 2007-08 AP reports from the College Board reveals the following:

1. The number and proportion of WCPSS students taking AP courses and exams continues to grow. Between 1996-97 and 2007-08, the number of students enrolled in WCPSS grew by 50%. During that same time, however, the number of students taking AP exams increased by 211% and the number of exams taken increased 231% (Figure 1).
2. As more students in WCPSS are taking AP exams, both the average exam score and the percent of exams with scores of 3 or higher have both dropped slightly (Table 1). This pattern is consistent with both state and national trends (Table 2 and Figure 2).
3. WCPSS AP exam scores (both average score and percent of scores 3 or higher) have surpassed the corresponding state and the national figures each year since 1996-97 (Figure 2).
4. The exams with the largest number of test-takers in WCPSS in 2007-08 were English Language/Composition (1,306), Environmental Science (1,253), U.S. History (1,050), Psychology (810), and Statistics (755), see Table 3.
5. In some courses, as the numbers of test takers have increased, the percentage of passing scores has generally decreased. Specific tests illustrating this pattern include English Language and Composition, Statistics, U. S. Government and Politics, and European History (Tables 3 & 4).
