

Construction Career Days 2007

Construction Career Days provide an opportunity for high school juniors and seniors to learn about rewarding careers in the commercial and highway construction industries.

During this event students will:

- Have hands-on access to power and hand tools used by the commercial construction industry, including nail guns and saws.

- Participate in interactive exhibits, such as:

rebar tying	tile setting
pipe bending	welding
brick laying	carpentry

- Operate heavy equipment used to build highways, such as:

skid steers	backhoes
track hoes	bulldozers
excavators	cranes

Contractor personnel, vendors, and university and community college representatives will be on hand to answer questions about training and educational opportunities for students interested in the construction industry.

The future is bright for the construction industry and there is a need for skilled crafts people and operator personnel.

Careers in Construction National Average Yearly Earnings

Architect	\$44,000—\$92,000
Building Inspector	\$26,000—\$62,000
Carpenter	\$26,000—\$58,000
