

AIG at RCMMS

AIG Teacher:

Karla James, NBCT
Language Arts Grade 8
kjames@wcpss.net

The AIG program provides an appropriately challenging education for students who perform, or show potential for performing, at remarkably high levels of accomplishment when compared to their peers. The goal for gifted education is to provide opportunities for the fullest development of each learner's potential. Students who have been nominated by a parent will be considered for the program.

- AIG ELA and math students are scheduled with other AIG students using cluster grouping.
- AIG enrichment sessions are offered on a rotating basis during Exploratory Enrichment time.
- Our AIG teacher consults with teachers to create materials to add rigor and challenge to the grade level curriculum.
- Students have access to math and/or ELA challenges on the AIG Enrichment Google Classroom for weeks when they do not have enrichment during Discovery.
