

Why Center for Innovation?

Centennial Campus provides students with skills and dispositions to navigate an ever-changing world.

Utilizing Design Thinking, students learn to empathize with others, solve problems and iterate solutions until finding success.

Students grow through layering and building their capacity for each of nine Characteristics of an Innovator. These characteristics propel students towards success for any future path.

Classrooms are learning spaces where students strive not to be the best but to get better. Teachers leverage curiosity to drive learning forward and to model a growth for students.

Campus Chatter

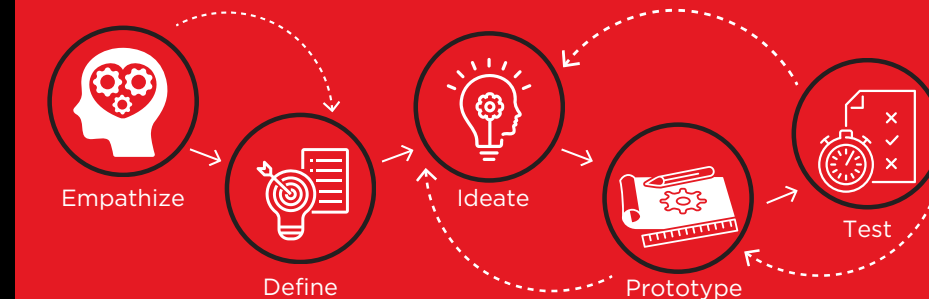

"I love how small Centennial is and the variety of electives you can take." - 8th grader

"The incredible staff takes the time to understand each individual child. It is a community that fosters trust, creating a learning environment that allows the students to thrive." - Parent

"Our staff is energized to teach our students how to think deeper and innovate through the design process." - Kathryn Hutchinson, Principal
