

WHAT WE OFFER

Join our weekly STEM sessions, where kids engage in hands-on science, technology, and engineering projects! We also offer fun-filled STEM camps, plus mobile birthday parties that bring the excitement to your location. For adults, we provide dynamic workshops for corporate teams and enriching sessions for senior citizens. No matter the age, our programs inspire creativity, problem-solving, and innovation through engaging, hands-on learning experiences!

STEM FUN STARTS HERE!

CRAFTING FUTURE INNOVATORS

At **YOUNG ENGINEERS**, we believe in fostering creativity, critical thinking, and a love for learning in every child.

Our programs are designed to make **STEM** exciting and accessible. Engage in fun, hands-on learning with building bricks. Nurture a love for science and discovery.

BRICKS CHALLENGE

BUILDING KNOWLEDGE,
ONE BRICK AT A TIME

Our **Bricks Challenge** program is a hands-on learning journey for children aged 6-12. Through building playful models, students discover the fundamentals of physics and engineering, sparking a lifelong passion for **STEM**.

GALILEO TECHNIC

UNLEASH THE INNER ENGINEER

Galileo Technic offers advanced exploration of mechanical systems for children aged 7-14. Using real-world examples, this program delves into complex engineering concepts, stimulating curiosity and critical thinking.
