BYOD Parent Session @ HRMS

BYOD- Bring Your Own Device, Holly Ridge Middle School

- BYOD -

Provides DYNAMIC learning opportunities for ALL students

Benefits

- Over 90 Schools currently participating in the BYOD program
- WCPSS hopes to have ALL schools participating in the next few years

Students

Increased engagement and interest in learning activities
Improved digital citizenship
Increased appropriate use of digital instructional resources
Increased proficiency in the Four Cs (Critical thinking, Communication, Collaboration and Creativity)
Become tool and resource agnostic
Increase ownership of the learning process (e.g. active participation, student led conferences, digital portfolio)
Increased productivity/organization

Benefits

- A Team of 4 Pilot-Group Members attended professional development in 2016-17
- ALL teachers at HRMS have been trained how to facilitate a BYOD classroom
- Innovative Teaching/Learning

BYOD Teachers

Better understanding of appropriate uses of technology (right technology-right time-right learner)

Increased use of student centered learning strategies

Increased use of technology-based instructional resources in the classroom

Increased confidence in ability to *facilitate and activate* student learning

More frequent use of data and collaboration with peers to make adjustments to their teaching

Become tool and resource agnostic

Promote effective communication and collaboration among colleagues, staff, parents, and students using digital tools

Benefits

BY 2020, WCPSS WILL ANNUALLY GRADUATE AT LEAST 95% OF ITS STUDENTS READY FOR PRODUCTIVE CITIZENSHIP AS WELL AS HIGHER EDUCATION OR A CAREER.

- Myriad of devices in the classroom (brand new laptops in each room)
- Purposeful tech-integration
- More flexibility for collaborative, engaging lessons

Long Term Outcomes

Increased engagement and collaboration among BYOD leadership, teachers, parents and the community

BYOD programs serve as a bridge between students' in-school and out-of-school learning

Schools become progressive learning environments that strategically integrate digital resources and emerging technologies

Teachers improve instructional practice around designing, developing and implementing digital learning experiences

Students are ready for productive citizenship, as well as college and career

95%+ graduation rate by 2020
