

Science Fair Requirements

- **Register by March 1st with a project description**
- **Complete research or design process**
- **Document all of your steps as you go through either the Engineering Design Process or the Scientific Method**
- **Create a trifold project board that documents each of your steps**
- **Practice talking about your project**
- **Be ready to speak about your project during the fair**
- **Have your project set up and be prepared by 5:30 PM on March 12, 2019**

Registration Form: If you can't register on-line, please return this form to your teacher.

Name: _____

Teacher: _____

What type of project are you doing?

Engineering Design Process _____

Scientific Method _____

Research and present (K-2 Only) _____

Title of My Project

I will need an electrical outlet to display

Yes or No

Brief description of my project:

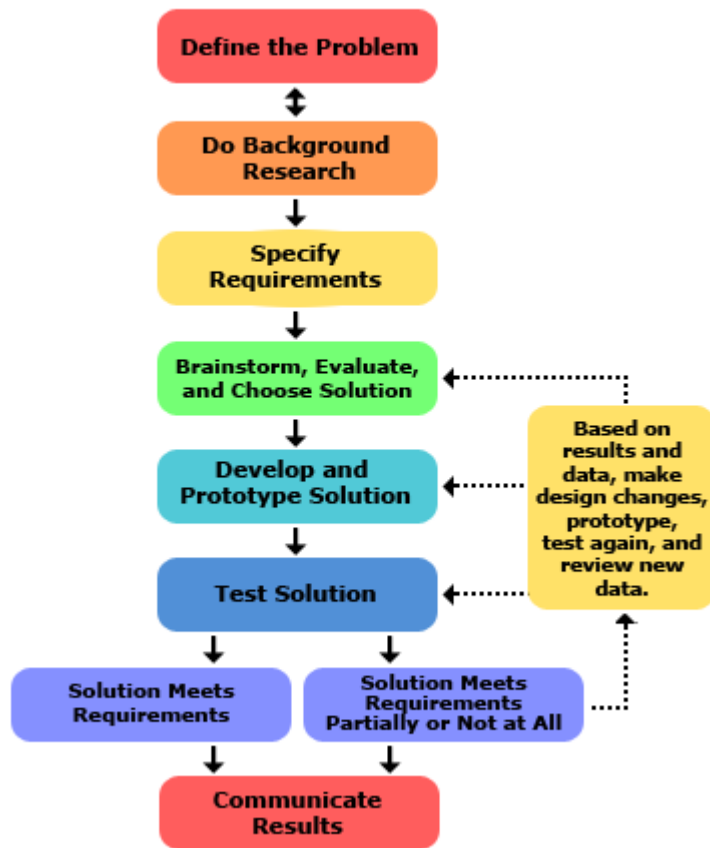

Parent contact e-mail address:

**Harris Creek
STEM/
SCIENCE Fair
March 12th,
2019
6:00PM –
7:30PM**

**For additional information contact:
Sara Roberson

STEM/SCIENCE FAIR

Harris Creek's STEM/SCIENCE Fair will take place March 12, 2019.

Students must sign up by March 1st to participate.

Students can follow the engineering design process to design a new technology or improve an existing technology. Remember that technology is anything made by people that solves a problem. You can create a new invention, a process, a material or a system that solves a problem.

Students can follow the scientific method to find support or to contradict a hypothesis they create after asking an inquiry question.

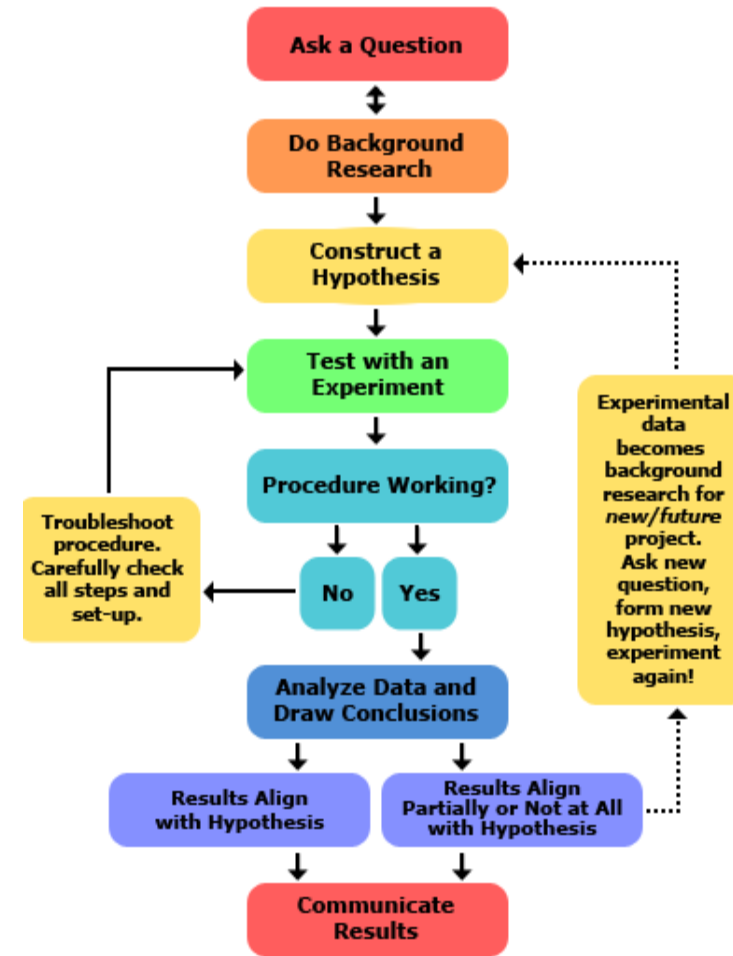

Please see the back panel for student requirements for the science fair.

To register electronically, scan the QR Code or follow the bit.ly link.
