

September 23, 2021

According to district guidelines, all students should have their temperature taken at home before coming to school. There are also a list of symptoms that require students to either stay at home or be picked up from school immediately if displayed. **These symptoms are:**

Fever or chills
Cough
Shortness of breath or difficulty breathing
Fatigue
Muscle or body aches
Headache
New loss of taste or smell
Sore throat
Congestion or runny nose
Nausea or vomiting
Diarrhea

If your child communicates that they have any of the symptoms, they must report to the Care Center and be picked up immediately. Please make sure you have others lined up to pick your child up in the event you cannot come to campus. We can transport your child home, place your child on the bus nor wait hours for arrangements to be made. We are asking that all families prepare for such a call. Because it's so contagious, it spreads quickly and you never know when your child may get sick.

After showing these symptoms, your child cannot reenter school without a negative COVID test (PCR/molecular) or a doctor's note with an alternative diagnosis. The student also needs to be symptom-free for 24 hours.
