

Five Themes of Geography Video Notes

What is Geography?

What are the five themes of Geography?

-
-
-
-
-

1). **Location:** Answers the question “where are we?”

There are two types of locations: _____ and _____.

Absolute Location:

-
-
-

Relative Location:

-
-

2.) **Place:** Place is defined as an area that has features that distinguish that place from other places.

Place describes the unique human and physical characteristics of a location.

Examples:	Examples:

3). **Human Environmental Interaction (HEI):** HEI looks at the relationships between people and their environment.

There are three key words to remember when thinking about HEI. They are _____, _____, and _____.

Questions to ask when thinking about HEI:

- How do humans _____ on their environment?
- How do humans _____ to their environment?
- How do humans _____ to their environment?

4). **Region:** A region is a area that is defined by certain similar or common characteristics. Unifying characteristics for regions can be _____, _____, _____, or _____.

Examples:

-
-

5.) **Movement:** Describes how people, products/goods, information, and ideas move from one place to another.

Examples of movement of products/goods:

Examples of movement of ideas and information:
