GLOBAL POINTS OF PROGRESS -- Africa: Nigeria marked three years without a polio case, meaning Africa could be declared polio-free as early as this year. The progress follows what Dr. Matshidiso Moeti, the World Health Organization's regional director for Africa, called a "monumental effort" of health workers across Nigeria, which in 2012 had 200 reported cases of the disease. If the continent is indeed declared polio-free, then Pakistan and Afghanistan will be the last major countries where the disease is endemic.
