**GLOBAL POINTS OF PROGRESS - Africa:** With more than 95% of the continent immunized, the independent Africa Regional Certification Commission has declared Africa free from wild polio. Vaccination campaigns are credited with eradicating the virus. In 1996, poliovirus affected more than 75,000 children across the continent, with some cases in every country. This strain is a rare mutation of the oral polio vaccine, which experts say will disappear as countries achieve herd immunity and phase out the vaccine.

Splash UNC is an educational enrichment program that allows over one thousand high school students to take classes created and taught by Carolina students. Classes include a variety of interesting topics ranging from exploring personality types and the political science of Star Wars to racial disparities in healthcare and economics.
