GLOBAL POINTS OF PROGRESS - Europe: France and Switzerland expand paternity leave. Switzerland became the last western European country to require paid leave for new fathers. Instead of one day off for the birth of a child, men will get at least 10 days off within the first six months, starting Jan. 1, 2021. Switzerland, where women gained voting rights in 1971, has historically been slow to address gender inequality, but the new policy brings them closer to their European neighbors. In France, President Emmanuel Macron announced plans to expand paternity leave from 14 days to 28 days, with one week being obligatory, starting next summer. The change will also apply to same-sex couples.
