GLOBAL POINTS OF PROGRESS DURING 2020 - Europe: From Russia to Portugal, we saw communities in Europe tackling climate change with new vigor. Austria closed its last coal-fired power plant on April 17, joining a growing number of countries reducing their reliance on coal; Germany is banning single-use plastic in line with a European Union directive; and Lithuania is recycling at record levels thanks to a deposit-refund system introduced in 2016. Eco-friendly transit alternatives are emerging in the United Kingdom, Northern Scotland's Orkney Islands became an unlikely leader in the renewable energy field by using their excess wind power to experiment with hydrogen fuel, and the U.K.'s first all-electric intercity bus route began carrying passengers between Edinburgh and Dundee this fall.
