The fungi are transported for sale 1,200 miles to Maputo, the capital.

## 2024 SUMMER OPPORTUNITIES

A summer program hosted by Duke: The Summer Training in Academic Research (STAR) Program provides a high-quality research experience for undergraduate students, **high school students**, and middle and high school teachers during the summer academic break. The eight-week program will give participants who are interested in science and medicine real hands-on experience in research methodology and writing. Participants are placed in teams and matched with Duke faculty mentors to work on an original, hypothesis-driven project, originating as a one-page summary and culminating in a complete research paper. A goal of the program is to have every participant qualify for co-authorship on a peer-reviewed manuscript related to their team's project. The STAR Program is held at the Duke Clinical Research Institute in Durham, N.C., which has organized educational and support programs for junior faculty, fellows, residents, and medical students as well as high school and college students. *Participants receive a stipend to attend, which makes the program an option even for students who planned to work over the summer break (see below).* Summer 2024 applications period is from Nov. 20, 2023 thru Jan. 05, 2024. There will be no extension. The program will take place on June 24 to August 2, 2024. *Questions may be submitted via email ([dukestarprogram@duke.edu](mailto:dukestarprogram@duke.edu)).*
