## STUDENT ANNOUNCEMENTS [GENERAL]

Yesterday was the 48th anniversary of Earth Day. Forty-eight years ago on April 22, 1970, 20 million Americans took to the streets, parks, and auditoriums to demonstrate for a healthy, sustainable environment in massive coast-to-coast rallies.

- Recycling saves energy. Every year, Americans generate more than 230 million tons of solid waste. By recycling about 30% of our waste every year, Americans save the energy equivalent of 11.9 billion gallons of gasoline and reduce the greenhouse gas equivalent of taking 25 million cars off the road

**GLOBAL POINTS OF PROGRESS - Scotland: Glasgow schools are drawing attention for their efforts to increase educational achievement for low-income children and their families. The approach has boosted attendance, scholastic achievement, and post graduation success. Officials noted the significant overall progress made in schools, especially during the past decade.**
