

How will grades be calculated?

Students will receive 2 types of assignments through Google Classroom.

Formative Assignments

- Used to monitor student progress
- Teachers will provide feedback to help students improve
 - Feedback may be through rubrics, total points, percentage, or comments
- Not used in final grades

Power Assignments

- Used to assess students
- Summative
- Used to calculate quarter, semester, and final grades

Power Assignments will be labeled as Power Assignments in Google Classroom

Upon completion, grades will be transferred to PowerSchool

Some Power Assignments can be retaken or improved. Teachers will note if the assignment can be retaken or improved when the assignment is posted to Google Classroom.

The most accurate grade for the quarter can always be found in PowerSchool.
