

Welcome TCE Families to our 2020 – 2021 Marvelous Music Adventure!

Music, like nothing else, has the incredible ability to affect change in all of us, including our children. Music finds the best in us and helps us cope in the worst of situations. It has always been and remains, a vital part of our being.

Music is not just a subject taught in the classroom; it is so much more. We have seen the impact music has on a child's life. We have also witnessed it be a catalyst for change in communities everywhere. Music remains an integral part of a well-rounded education, empowering children to develop the creative attributes that will propel them in school and in life.

Besides musical abilities, music education develops creativity, responsibility, discipline, dependability, composure, confidence, social and communication skills, emotional maturity and so many other valuable traits and skills. Music provides our students with greater mental health support, a safe place where they collaborate, reflect, and persevere. It provides crucial preparation for life.

Music is critical as we develop our next generation. That's where you come in. As our partner, we ask that you share with us the goal to see students bloom and reach their full potential. Whether faced with scheduling changes or student attrition. Our music program will continue to find innovative ways to develop skills within our students that will carry over into other subjects, helping them find greater academic achievement, confidence, and personal growth.
