*The WIDA 2020 Key Language Uses reflect the most high-leverage genre families across academic content standards. For the [Key Uses \(Narrate, Inform, Explain, and Argue\)](#) there are descriptors for the four language domains (Listening, Reading, Speaking, and Writing). In this form, *Narrate and Inform* replaced *Recount* from the previous version (2012). *Discuss* remains, as a means, to show oral language as it highlights the importance of oral language development for meaningful participation of all language learners, regardless of their level of language proficiency. Even though *Discuss* is no longer listed as a key use it is vital that we intentionally integrate discussion opportunities into daily instruction.

**The descriptors in Level 6 represent the language performance of students who have met all the criteria for Level 5. Unlike the descriptors at Levels 1–5 that provide examples of performance at the end of the level, the descriptors at Level 6 are examples of performance within Level 6.

The WIDA Can Do Descriptors, Key Uses Edition, provides examples of academic language use for four specific communicative purposes. These purposes, referred to as Key Uses, were identified based on reviews of literature and a language analysis of college and career readiness standards. The example descriptors are not exhaustive but are meant to help guide the planning and conversation around meaningful participation of language learners in standards-based content curriculum, instruction, and assessment.

The WIDA Can Do Descriptors, Key Uses Edition, can help...

- differentiate curriculum, instruction, and assessments designed in English based on language learners' levels of English language proficiency.
- collaborate and engage in instructional conversations about the academic success of language learners in English environments.
- advocate for equitable access to content for language learners based on their level of language proficiency.
