

TO: Academy of Engineering & Advanced Manufacturing Parents  
 RE: Sophomore Job Shadowing Opportunities

We are reaching out to you to help us continue to expand our network of job shadowing opportunities for Academy of Engineering & Advanced Manufacturing students.

Job shadowing gives students an opportunity to experience a role in a real work setting. In prior years students have been exposed to a myriad of companies, work environments and careers, including:

Industries	Work Environments	Careers
Architectural Services Construction Computer Science Financial Healthcare Manufacturing Pharmaceuticals Retail	Construction Sites Corporate Headquarters Co-working Spaces Fortune 1000 companies Private companies Start-Ups	Architects Engineers Interior Design Accounting Project Management Human Resources Programming Marketing/PR

This year's **Job Shadow Day** has been set for **Thursday, April 23, 2020**. A job shadowing experience typically lasts half a day (3-4 hours). The Wake County Public School System does have liability insurance on students participating in job shadowing.

You can help us expand the number and type of job shadowing opportunities by

1. identify (or create) a job shadow opportunity through your workplace or through a contact
2. approach the business/stakeholder (if necessary) to gain commitment to host a student for a job shadow
3. facilitate logistics and communication with AOE+AM Program Director - Diane Cadavid

For more information on job shadowing see the page on our Academy website

<https://www.wcpss.net/Page/14024>

To host students to job shadow on Thursday, April 23, 2020 please use this link to register:
