Business Alliance

21st Century Leaders

Purpose and vision

The Southeast Raleigh Magnet High School Business Alliance was formed to consolidate school and community resources to support the students at SRMHS. The Alliance meets monthly and is comprised of administrators, teachers, business professionals and leaders in area faith based communities. These stakeholders significantly impact our school with: mentoring, tutoring, donations, resources for our athletic program, special events and student recognition activities. Our goal is to solicit the support of each member of the community who will help our students succeed academically, emotionally and socially.

School Improvement Plan Goals

In collaboration with identifying and meeting school goals, the business alliance offers suggestions to support students with disabilities, ESL students, parents, and the community.

Speakers' Bureau

The Southeast Business Alliance sponsors monthly presentations that focuses on Careers, College and Citizenship. Our goal is to enhance student career interests and success.

Topics include but are not limited to: resume writing, academic success, interviewing skills, financial planning, information regarding college planning and military opportunities.

Mentoring

The goal of this committee is to establish a cadre of mentors from various community organizations who will work with students at Southeast Raleigh Magnet High School. The members of the committee will recruit other business leaders who are committed to fostering relationships with high school students. The mentors will be assigned to an individual or a small group that will meet regularly during the school day or after school.

Community Outreach

The members provide and solicit school supplies, clothing, food and other resources to assist SRMHS students and their families. The intent is alleviate stress on the family so the student can focus more on their education.

Job Readiness

The goal is to help students make the important transition from school to career. We provide several services for students, faculty and the community.

- Navigating the job search process
- Providing tools for resume development
- Internships
- Job Shadowing
- Recruitment
