All work is expected to be neat and labeled on separate paper. No *legible* work = no credit. You should NOT use a calculator unless the problem is labeled with a (\*) and bold. A good resource for review is the website www.coolmath.com (choose precalc/calc). You can also go to my website: www.kreganmath.weebly.com

This will be collected on Day 1 with a quiz on this material Day 3. This summer assignment is intended for you to do as REVIEW to prepare for the quiz – your first grade in AP Calculus. If you struggle with any of these concepts, you may need to do additional review on your own as needed in order to be prepared for both the quiz AND this course.
