STEM Stories

Taught by Amy Long

Grades K-2

Do you love science, literature and hands-on fun? Then this is the club for you. Each week we will be exploring STEM through exciting books and then completing a hands-on, STEM based project. We will be building parachutes to escape from a giant, engineering balloon powered cars to see who can win the race, testing catapults to see who can hit the target and much more! Join us as we read, explore and create through books and science!

Robotics

Taught by Enola Grice and Anna Goodrum

Grades 2-4

Come work your brain as you explore the world of programming and circuitry. In this club students will investigate the science behind game coding, engineering, circuitry, and robotics with thrilling experiments and projects. We will create LED paper circuits, learn how to code through games, and experiment with robotics. Get ready to create, invent and discover in this amazing club.

Crack the Code- History Mystery Detectives

Taught by Sara Swift

Grades 2-5

In this thrilling club, students will become detectives as they uncover clues to solve each week's history mystery! At the start of each club students will be placed in teams and given a box with their hands-on clues. Each clue will lead them to connect the pieces of their mystery puzzle. Problem solving skills will be put to the test as students uncover the mysteries behind famous historic sites and events. Come put on your detective hat and crack the history mystery code!

Salsa Dance!

Taught by Arturo George

Grades 2-5

Would you like to learn how to Salsa dance? Come join Mr. George to learn how to move your arms, shoulders, feet, and legs along with Salsa music. Once we master the basics we will move onto higher level skills. You don't want to miss out on this active, fun filled club. Come get your spot on the dance floor!

Hooked on Crochet Club**Taught by Rosario Gravino****Grades 3-5**

Come explore the exciting art of crochet! During this club students will learn various types of crochet techniques. We will start with a chain to make a headband, a scarf, or maybe a poncho! This club is open to all types of crocheters, whether you have skills to share, or if you have never tried to crochet. Come join us and get hooked on crochet!

Activate Your Imagination Through Art!**Taught by Brandy Smith****Grades 3-5**

Calling all artists! In this club students will explore famous works of art and learn about the ideas that inspired these artists. Students will then have the opportunity to exhibit creativity and critical thinking by creating their own masterpieces using a variety of media: acrylic on canvas, clay, watercolor, chalk pastel, and mixed-media. You won't believe the amazing, creative pieces we will create!
