ABOUT ME

I have been working with a diverse pediatric population since graduating from Florida State University's Speech/Language Pathology program (Go Noles!) in 2002. I understand how important it is for family involvement and open communication to ensure child success and trust. When not working or spending time my eleven and thirteen year old, I enjoy hiking, running, and traveling.

2021-22 GOAL

I will go from exercising 2 days per week to 4 days per week by October 1, 2021.
