About KidzArt®

KidzArt® is a fine art program with 25+ years experience teaching art education to children. Our certified art instructors provide a nurturing environment where children of all skills levels can explore, create, and advance their skills in drawing, painting, and design.

What Students Learn...

Drawing

If you can dream, you can draw! Using our easy to follow step-by-step teaching method, students will get to experience and explore a variety of artistic styles such as realism, abstract, technical, and graphic art.

Painting

Whether it be oil pastels, chalk pastels or watercolor paint, students will work with a variety of mediums as they learn about color, blending, and brushstrokes to help take their painting skills to the next level.

Mixed Media

Experiment. Create. Discover! Students will learn how to combine a variety of media into a single artwork as they explore the endless possibilities of color, texture, and design. The result? A unique work of art students can call their own.
