Important Academic Items

Reading Books: Students are **required** to read their own, self-selected, fictional books **EVERY DAY** as well as complete assignments about their readings. Students may bring their own books from home or check-out books from the media center.

Calculators: Math 1 students are required to have a graphing calculator and Math 8 students are strongly encouraged to purchase one for use at home and school (example: TI-84 PLUS CE). While we will always have calculators available in the classroom, this is a mathematical tool you will use for the next 5 years (at least).
