Chess

Written by: Rahul and Victor

Have you ever wondered about chess?

Chess is a very complicated game . It starts by two colors of armies battling until the king is checkmated.the pieces do different things.the name of the pieces are the queen,king,knight,bishop,pawns,rooks.the material they are worth is that the queen is 9,the knight,and bishops are 3,pawns are 1,rooks are 5,the king's worth the whole game.To checkmate.

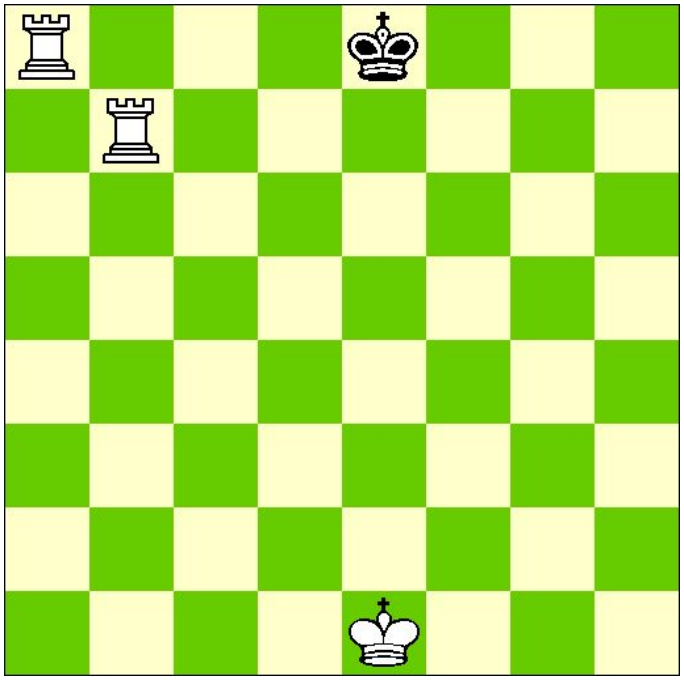
How the pieces move

First the knight moves in a capital L shape it can hop over pieces. The king moves one step at a time.The queen moves diagonally ,vertically,horizontally and it can't hop over pieces like most
Other pieces

Checkmate

Checkmate is the main thing of the game.It's when the king is in danger and it can't move anywhere because the opponent's pieces are guarding the other squares the king could go to.

This is checkmate because the bishop is escape supporting the queen.



This is checkmate because the two guarding the squares.
