

Dear Parents,

We will begin our next unit of study in math soon. The information below will serve as an overview of the unit as you work to support your child at home. If you have any questions, please feel free to contact me. I appreciate your on-going support.

Sincerely,

Your Child's Teacher

## Unit Name: Shapes

### Common Core State Standards:

**1.G.1** Distinguish between defining attributes (e.g., triangles are closed and three-sided) versus non-defining attributes (e.g., color, orientation, overall size); build and draw shapes to possess defining attributes.

**1.G.2** Compose two-dimensional shapes (rectangles, squares, trapezoids, triangles, half-circles, and quarter-circles) or three-dimensional shapes (cubes, right rectangular prisms, right circular cones, and right circular cylinders) to create a composite shape, and compose new shapes from the composite shape.\*

\*First Grade Students do not need to learn formal names such as "Right Rectangular Prism."

### Essential Vocabulary:

- |             |               |                     |
|-------------|---------------|---------------------|
| • Angle     | • Face        | • Side              |
| • Attribute | • Feature     | • Solid             |
| • Closed    | • Half        | • Square            |
| • Compose   | • Half Circle | • Three-Dimensional |
| • Cone      | • Open        | • Trapezoid         |
| • Cube      | • Plane       | • Triangle          |
| • Cylinder  | • Prism       | • Two-Dimensional   |
| • Edge      | • Rectangle   | • Vertices          |

From previous grade: circle, rectangle, hexagon, sphere

### Unit Overview:

First Grade students use their beginning knowledge of defining and non-defining attributes of shapes to identify, name, build and draw shapes (including triangles, squares, rectangles, and trapezoids). They understand that defining attributes are always-present features that classify a particular object (e.g., number of sides, angles, etc.). They also understand that non-defining attributes are features that may be present, but do not identify what the shape is called (e.g., color, size, orientation, etc.).

As first graders create composite shapes, a figure made up of two or more geometric shapes, they begin to see how shapes fit together to create different shapes. They also begin to notice shapes within an already existing shape. They may use such tools as pattern blocks, tangrams, attribute blocks, or virtual shapes to compose different shapes.

### Strategies/Skills:

- First Grade Students reason with shapes and their attributes.
- Students compose and decompose plane or solid figures (e.g., put two triangles together to make a quadrilateral)
- Build understanding of part- whole relationships as well as the properties of the original and composite shapes.
- As they combine shapes, they recognize them from different perspectives and orientations, describe their geometric attributes, and determine how they are alike and different, to develop the

### Wake County Public Schools, Unit Overview for Parents

*This document should not replace on-going communication between teachers & parents.*

Dear Parents,

We will begin our next unit of study in math soon. The information below will serve as an overview of the unit as you work to support your child at home. If you have any questions, please feel free to contact me. I appreciate your on-going support.
