

The Wake County Public School System (WCPSS) Board of Education defines acceleration as allowing a student to move through traditional educational organizations more rapidly, based on readiness and motivation. Students currently participating in Single Subject Acceleration (SSA) may be considered to skip an additional year of content in the same area, for the purpose of providing access to appropriately challenging learning opportunities in **math**. This is known as additional acceleration in the same content area.

Please review the following regarding the Additional Acceleration in the Same Content Area process:

- ★ Assessment for Additional Acceleration in the Same Content area will include two assessments that are administered to qualifying, nominated students during an open SSA Testing Window for the child's calendar.
 - Students will be assessed on the current math course they are participating **and** the course they are looking to skip. Both assessments will be administered to nominated students during the SSA testing window.
 - These **above grade level comprehensive** assessments will establish mastery of the foundational skills. Moving at this fast pace, there is a potential for significant math gaps, so the criteria for this type of acceleration is rigorous.
- ★ If all of the below criteria is not met, an additional year of acceleration is not an option.
 - Has a 3 or 4 OR A or B on each quarter in the accelerated class
 - Receive a **90%** on the the Acceleration Assessment for the course they are currently being accelerated
 - Receive a **90%** on the Acceleration Assessment for the additional course a student is looking to skip

Important Information to Review:

- ★ Students have one attempt at the exams.
- ★ Prior to the exams, students may review the content standards for the course or subject area that they are seeking to demonstrate mastery.
- ★ Acceleration assessments will be reported as a percent correct. Parents and students understand that they will not receive a breakdown of questions/standards missed.
- ★ Due to test security, items on the test will not be able to be reviewed on any Acceleration Assessment.
- ★ Students that do not meet the criteria for Additional Acceleration in the Same Content Area understand that an additional year of acceleration will not be an option for the 2019-2020 school year.
- ★ All decisions are final; eligibility to accelerate is based on meeting the above criteria.
- ★ Accelerating in math could result in online learning to access advanced curriculum in elementary, middle and/or high school.
